

A WORD FROM JOHNNO

Hi All,
 We are now well into winter and the opening milk prices have been announced. They were not too bad, I personally thought they could have been a bit higher. But that's the opening price-lets hope there are lots of step ups through the next season.
 Our Robot installation is on the way and we are full steam ahead, we will be posting photos along the way on facebook and the Westfalia Warragul website. I am personally excited, Evan and Sheriden are great to work with. The amount of Hi-Tech machinery we are putting in will make this dairy one of the most Hi-Tech dairies, (if not *the* most Hi-Tech dairy in Australia).
 Apart from the Robots we will have a complete feeding batching system designed by Skiold as well as automated flush valves for the yard.
 Both stores are doing a great job servicing the local farmers, and we would like to say thank-you to our loyal farmers for their ongoing support.
 By the time this newsletter goes to print, we will be the new Supagas dealer in our area, and we are very excited about that. The new products that we will be selling and delivering are 45kg gas bottles as well as 15kg fork lift bottles. In the near future we will have BBQ gas bottles for swapping or purchase at competitive prices.
 On the employee front we have just had acceptance for our job as an installation technician. We are not sure of his start date, but it will hopefully be by the end of July.

Johnno
